

Instant Calculation

Instant Quality

Thread Disk for Windows (TDWIN) is Gagemaker's popular engineering software for instantly calculating critical thread dimensions based on ANSI tables and formulas.

Thread types supported by the program include:
UN, UNJ, and UNR Series,
ACME, Stub ACME,
Stub ACME Modified I
and II, Metric M & MJ,
7° X 45° Buttress, and
general purpose pipe
threads.

Combining Thread Disk (TDWIN) with Gagemaker's thread measurement gages creates the perfect quality control equipment package. Together, they eliminate many thread manufacturing and quality control problems.

Gagemaker's thread measurement gages accurately inspect thread element variations, ensuring the manufacture of the highest quality product.

Our new full-color product catalog is now available.
