

# Round and Frame Style Setting Standards Pitch Diameter Gages

## MRP Series

Round Style      Frame Style  
Setting Standards

Round standards set the distance between the thread shoes on the MRP gages

Frame standards set the distance between the thread shoes on the MRP gages

### HOW TO ORDER

Select the round or frame style standard model, based on the size and type of connectors being measured.

The round and frame style setting standards are designed to preset all models of the MRP Series gages for accurate inspection of API threaded connections. These standards consist of a rigid, non-adjustable steel block precision machined to proper size to tolerances of  $\pm .0003$ ".
