

SG-8001 with Adjustable Indicator Post

Using the SG-8001

API Spec 5CT requires pipe ends to be inspected for end hook.

The Saddle Gage (SG-8001) measures the amount of hook or bend in the end of a joint of pipe.

The indicator post adjusts to pipe diameter.

Additional roller contact points are available and are sold separately.

Features

- .001 resolution indicator
- Adjustable indicator
- Adjustable leg spacing provides a measuring length of 40"
- Special "V" legs rest on the pipe body and measure eccentricity of the upset
