including Drawings and Reports

HOW TO ORDER

Simply contact Gagemaker directly or one of its authorized distributors.

Gagemaker's TDWIN TAPER software program produces dimensional drawings and inspection data for API downhole tubular connectors based on the most current industry standards. Everything you need to machine, inspect, and document tubular connection threads is available in this convenient software program.

The TDWIN TAPER provides easy access to information for both preferred and non-preferred Rotary Shouldered Connections, Tubing and Casing Connections, and any combination of Crossover. The program offers standard connection types and sizes. TDWIN TAPER displays connection drawings, inspection gage information, and setup and inspection reports.

The software displays printable drawings suitable for manufacturing that follow ASME Y14.5 standards for industry compatibility. Print gage setup and inspection reports with your company logo and work order information. The program offers the choice to save reports and jobs for future reference.

Includes connection data for:

Rotary Shouldered Connections

| | | |
|--------------------------|------------|-------------------|
| API Numbered Connections | PAC | Slimline H90 |
| API Regular | Slim Hole | External Flush |
| Full Hole | Wide Open | ACME Regular |
| Internal Flush | eXtra Hole | ACME Streamline |
| Open Hole | H-90 | Double Streamline |

Tubing and Casing Connections

| | |
|---------------------|---------------------------------|
| NUE Tubing | USS Improved Buttress Tubing |
| EUE Tubing | Line Pipe |
| Short Thread Casing | Special Clearance Couplings |
| Long Thread Casing | SR13 Seal Ring Groove Couplings |
| Buttress Casing | |

System Requirements

- Windows XP or higher
- 1 MB RAM or more (recommended)
- USB 2.0 port (software provided and maintained on portable flash drive)
- Internet Connection for first time use for registration
- .Net Framework 2.0 or later
- Minimum Screen Resolution of 1024 x 768

Features

- Follows API Specification 7.2, Dec. 2008, for Rotary Shouldered Connections
- Follows API Specification 5B, Oct. 2008, for Tubing and Casing Connections
- Presents "preferred" connections as well as interchangeable and obsolete connections
- Organizes data compatible with API and industry knowledge offered by resources such as Smith, Joy, and Hughes
- Displays Gagemaker style thread gages and gage setting information
- Configures and prints reference drawings for manufacturing including; standard pin/box/coupling, pin/box blanking, pin/box relief groove, box modified bore-back relief, special clearance couplings, and SR grooved couplings
- Produces gage setup reports for tubing, casing, RSC, and crossover combinations
- Provides inspection reports for all connection configurations selected
- Customize reports with your company logo
- Save reports to job files and recalls them for future reference
- Provides web links to locate and purchase necessary gages and standards
